1 Letter no. Ls D 1590 dated 6/4/33 from the President, Mysore city mdel requesting that the water supply Department may be instructed to execute the work of installing a duplicate chlorine plant at the Jewel filters Mysore, at their cost, treating the cost sanctioned as their share due to the Municipality on account of water supply schemes, for which amounts have been advanced during the current year

1 The Mysore city mdel has submitted an estimate for Rs 5000/- for this work on 25/2/33.

2 The President states that the installation of a duplicate chlorine plant is a part of the capital works, one third cost of which is debitable to Govt as per Go no L4285-8 mdl 84-26-6 dt 7/1/27

Para 7(1) of the G.O. dt 7-1-1927 refers to the share of cost of repairs and maintenance charges to be borne by the Municipal Govt

3 The Director of Health may if approved be consulted unofficially in the matter.

4 Submitted for orders with references

Gs. CB 8.4.33

5 The President states that nearly Rs 12,000 have been advanced by the MCC during the current year for improving the distribution system in the city & that taking account of the cost of the duplicate chlorine plant now proposed, viz, Rs 5000, the Govt share out of the total expenditure will be more than Rs 5000 He accordingly requests that the Water Supply Dept may be asked to execute the work at their cost, treating the amount as Govt contribution

6 The Director of Health may be consulted etc on the proposal

Dated 12. 1

9 Retransmitted with Compliments Rs. 12,000/-, which amount the Municipal President states, has been spent on improvement of distribution, is a charge on Municipal Funds in full. Government do not seem to have paid any quota towards this item of work in the past The point now raised is a ne one It is however difficult to follow how improvement of distribution can be considered a capital charge.

10 As regards the chlorinator, it is certainly a capital charge and Government is committed to 1/3rd of quota

11 The question of providing a chlorinator is urgent, in view of the necessity to safeguard the drinking water supply. It would be possible for this Department to find 1/3rd of the cost.

17 Para 7 (1) of GO no L 4285-8-Mc 84-26-6 dt 7.11.29 says that the cost of operation and maintenance will be borne by the Municipality and the Govt in the proportion of 2:1. It is not clear if this applies to Capital expenditure also or whether there is any

K

NOTE—Contn Sheet

Letter asking regarding the apportionment of capital expenditure

18 In para 2 of his letter, the President has stated that one third of the cost of the chlorinating plant, which is a capital work, as well as one third of the sum of expenditure of Rs 12000 advanced by the MES for the improvement of the Distribution System during the year should be met by Govt. The Director of Health, however, thinks that while Govt is committed to 1/3 of the cost of the chlorinator as being a capital charge, the sum spent on improving the distribution system is a charge on municipal funds in full as it cannot be considered a capital charge. He also states that Govt do not seem to have contributed in the past towards this item of work.

19 Forwarded with compliments and threads to the Chief Engineer for favor of opinion whether —

(i) the expression 'cost of operation and maintenance' in para 7(1) of the GO of 7 1 1927 refers to both capital expenditure & maintenance charges, vide para 17 supra

(ii) the improvement of the distribution system is to be regarded as capital & maintenance charge,

(iii) the Govt have in the past paid their quota towards the cost of improvement of distribution in Mecca,

(iv) the contention of the President in para 2 of his letter is correct

NOTE—Contd. Sheet

WD 70—GBPM—60 000—13-8 31

Subd with reference to para 14 supra

21) According to letter Chief Engineer's Opinion both the cost on account of the improvement & distribution & that of the installation of the Chlorinating plant have to be regarded as capital expenditure and debited to the Municipality. It is stated that under G.O. No. L 4285-8 Dgt. 2-7-1927 Re 84-26-6 the cost of the Annual Maintenance charges of the Vani Vilas Water Works is being borne by the Municipality & the Govt in the proportion 2:1 & that Govt have not borne any share of the cost of improvement & distribution in the past. The Chief Engineer is of opinion that the contention of the MC in para 2 of the President's letter is not correct.

22) The Director of Health has, however, stated that the cost of the Chlorinator is a Capital charge that Govt is committed to 1/3 of the cost. The authority for this statement is not mentioned.

23) In connection with the scheme of improvement of Water Supply at Mysore, it has been stated that the request of the MCC to treat one-third of the cost as Govt outlay would be favorably considered & the question of giving a loan to the MCC for meeting the other two thirds is separately under consideration. This for ades if on the same analogy the one third cost of the improvement & Distribution & the Chlorinator may be met by Govt as requested in para 2 of the President's letter.

Retransmitted with compliments.

35 At the time I wrote my last note (para 9 of the Unofficial file), I had not before me the Government Orders of 1926 and 1927. I have since obtained and gone through them.

36 Government Order of 1927 clearly states that as regards maintenance (i.e., items of expenditure which are of routine nature and recurring), the Municipality and Government share the cost in the ratio of 2 to 1, and that all charges on capital works will be borne fully by the Municipality.

37 Chlorinator is a capital charge and so its cost has to come entirely from the Municipality.

38 Improvements to distribution is not maintenance but capital charge, hence any cost incurred on it, is entirely debitable to the Municipality.

39 In the light of the above, the entire amount of Rs. 12,000/- spent by the Municipality on recent improvements to the distribution and the full cost of the proposed installation of the new Chlorinator have to be debited to the Municipality.

NOTE—Contn Sheet

dated 12th June 1933

40) In view, however, of the Dewan's Minute, it would perhaps be possible to include the Chlorinator in the Estimate for the proposed improvements to the Water Supply, 1/3 cost being debited to Government.

6/7/33

Director of Health.

41) Please put up a copy of the order issued yesterday sanctioning certain improvements to the Nuwara Eliya Water Supply.

42) A copy of G.O. No. 112-115 Mis. 46-31-142 dated 6/7/33 is put up as directed

7/7/33

43) It is not known if the cost of the chlorinator & of the improvement in the distribution system referred to in para 2 of the President's letter can be taken as included in the improvement works sanctioned in the G.O. dated 6/7/33 & if so, Govt need not contribute anything further. Otherwise they will have to meet the whole of Rs 5000 for the chlorinating plant as requested by the Mayor.

44) The Director of Health may be consulted & a report submitted.

Chief Secy)

14/7/33

45) Forwarded with compliments & enclosures to the Director of Health for favour of further remarks.

47) Transmitted with compliments to the Chief Secretary with the following remarks.

48) The sum of Rs. 12,000/- referred to by the President, Municipal Council in his letter is for certain improvements to the distribution. This is original work. Such are practically annual. This sum of Rs. 12,000/- has to be met by the Municipality and it should not form part of the proposals of improvements sanctioned in Government Order No. 2 112-15/Mal 246-34, Dated the 6th July 1933.

49) The Chlorinator has not yet been ordered for. It can be included under works (a) Improvements of the Pumping Units and Filters mentioned in the Government Order of 6th ~~July~~ 1933 referred to above.

It will be possible to meet the cost (Rs.5000/-) from savings in the sanctioned estimate of Rs.1,01,070/- for these works.

15 June 1933 A

Director of Health.

50) In view of the Director of Health's remarks it is for orders whether any separate orders on the subject are still necessary. Government may if approved be communicated accordingly.

Dated 3rd April 1933.

6 APR 1933

GEN & REV SECT 4342 7 APR 1933 L.S.G. BRANCH.

mc 281-32-1

FROM

B T KESAVA IYENGAR, Esq, B A,
PRESIDENT, CITY MUNICIPAL COUNCIL,
MYSORE

To

The General Secretary to the Government
of His Highness the Maharaja of Mysore,
Bangalore.

GENERAL SECRETARIAT 7 APR 1933 No. L.S.9

SIR,

I have the honour to state that the Executive Engineer, Water Supply Division, sent an estimate for Rs.5,600 for installing a duplicate chlorine plant at the Jewell Filters, Mysore on 22nd November 1931. The Managing Committee considered this subject on 21st December 1931 and resolved that this work could not be taken up for want of funds then. On account of the urgency of the installation of the duplicate chlorine plant, another estimate for Rs.5,000/- was received from the Water Supply Department again on 13th October 1932. The necessity for such a plant is explained in the enclosed copy of the report which accompained the estimate. After obtaining needful information in the matter, the Council sanctioned the estimate in their Resolution No.339 dated 25th February 1933, a copy of which is herewith submitted for favour of sanction of Government.

2 In this connection, I beg to point out that the installation of a duplicate chlorine plant is a part of the capital work one-third cost of which is debitable to Government as per Government Order No.L.4285-8/M1 84-26-6 dated 4/7th January 1927. The Municipality has during the current year advanced nearly Rs.12,000/- on improving the distribution system in the City and 1/3rd cost thereof is due to the Municipality as already intimated to the Water Supply Department from time to time, in the several letters accompanying the ----- countersigned estimates Including the present charge the

the Government share would amount to more than Rs.5,000/-, the cost of the present scheme being Rs.5,000/- only. Besides, there is no provision for this item of expenditure in the sanctioned budget, nor is it possible to reappropriate the required amount from any other source. Hence, I request you to kindly instruct the Water Supply Department to execute this work at their cost, treating the cost so incurred as their share due to this Municipality on account of water supply schemes, for which amounts have been advanced during the current year.

I have the honour to be,

Sir,

Your most obedient servant,

President.

339. Estimate for Rs.5,000/- for the installation of a duplicate chlorine plant for water supply in Mysore City.

Also Council's Resolution No.264 dated 21-12-1932 resolving that further information may be obtained as regards need for chlorination in addition to Jewell Filtération, and letter No.1341 dated 27/28th January 1933 from the Executive Sanitary Engineer, on the subject.

Resolution- The estimate is sanctioned.

x x x

Sd/-B.T.Kesava Iyengar,
President.

"Copy"

President.

R E P O R T.

The accompanying estimate for Rs.5,000/- provides for purchasing and installing a duplicate Chlorinator at Jewell Filters Mysore, for sterilizing the filtered water supplied to the City of Mysore.

At present the water supply installation plant at the Jewell Filter Station at Mysore is equipped with a Jewell Paradon Chlorinator which is in service 1929. This chlorinator which is kept in continuous service throughout the year and when it requires time for overhauling or repairs, it has to be put out of service and the filtrate allowed to flow to the City without any sterilization till the plant is restored to service. Also the existing unit consists of too many metal parts and the highly corrosive action of the chlorine gas, has severely affected those parts and in addition these small and costly parts have got to be renewed very frequently, as is seen from actual experience for these two years and a half, the period of renewal being generally as short as 6 months, entailing heavy recurring maintenance costs. For instance we spent Rs.750/- for the replacement of parts. It worked alright for 6 months and it has begun to give trouble now.

It is, therefore, proposed to purchase and instal a new chlorine set as in additional unit, which can be readily put in service when the existing one fails to give satisfactory service. This new type has to be more efficient and have as few corridible parts as possible, and therefore provision is made to instal a chlorinator manufactured by the Wallace and Tiernan Company, which unit is said to be more efficient and of larger application in water works installations. Provision has also been made for all other items of work necessary with

regard

154

regard to its erection at Mysore, and its upkeep throughout the year in an efficient condition.

It is expected that with this additional unit the water supply to the City can be assured of bacterial efficiency throughout the year.

B. D. Gadgil

Executive Sanitary Engineer,
Bureau of Sanitary Engineering.

bSE.

17/10/32

Extract of Dewan's minute of 12/6/33
in municipal file 246 of 31

x x x

The Go of 30th Jany 26 makes the Municipality responsible for meeting the entire cost of the capital works. As a large part of the water supplies by the project is used for Govt buildings and institutions and for the palace, the Municipality has all along been contending that the Capital Cost should be shared between itself and Govt and that it should not be called upon to bear the whole cost. It is on this ground that the cost of maintenance and operation is borne by the municipality and Govt in the proportion of 2:1 according to the Go of 7/1/27 The adoption of a similar sharing arrangement in respect of capital outlay is reasonable Vide opinions expressed on this point in the notes of 8/10/30 and 15/10/30 by the late Mr Balasundaram Iyer and myself I accordingly stated that it would not be possible for Govt to agree to contribute more than one-third of the cost
